

Revised September 1, 2010

Name: HAWCTYZONING

Layer Type: Polygon

Projection: UTM, Zone 4 (Meters), Datum NAD83

Description: Hawaii County Code, Chapter 25, Zoning Code

Source: County of Hawaii, Planning Dept.; Various District and Urban Zone Maps (hard-copies), using the Parcel Data layer current as of September 2010.

History: Created by the staff of the County of Hawaii, Planning Dept., using the 'PUT' command in ArcEdit of the Arc/Info software, version 7.2.1 program. Where zoning lines follow along parcel boundaries, the Parcel Data Layer was used as a background. Updates to the Zoning Layer are done in ArcInfo\ArcEdit coverage, version 9.3.1.

The State Office of Planning (OP) receives periodic updates of this layer from the County of Hawaii, and projects the data from the State Plane and the UTM projection as a convenience to the State GIS users. OP also posts the data to the Internet for download as a convenience to the public.
